

Children's Health
Education Center™

A member of Children's Hospital and Health System.

Dear School Partner,

Thank you for allowing Children's Health Education Center, a member of Children's Hospital and Health System, the opportunity to provide your students health education for the past 15 years. I hope you and your students have enjoyed and benefited from participating in our programs whether it has been at our center or at your school.

As CHEC has been evolving, we will no longer be offering a broad range of field trip and outreach programs. Instead we will be partnering with selected schools to delivery targeted face-to-face (field-trip and outreach) programs. With these schools, we will focus on the critical health needs of children in our community while helping the health system reach its vision of developing the healthiest kids in the country. These changes are effective in the fall of 2010.

We will continue to be a resource for health education and information. For all students in grades K5-8, we offer fun and engaging Bluekids.org e-learning programs. These programs, designed with input from teachers and pediatric experts at Children's Hospital of Wisconsin, focus on a variety of important health and wellness topics for children. All programs are game-based, online and interactive, allowing for a blend of technology, activities and discussion. All programs also allow teachers to track and manage their students' learning activities and have proven outcomes of changing knowledge, attitude and behavior. To preview the BlueKids.org programs, at no cost, visit healthykidslearnmore.com. For more information please contact us at chec@chw.org.

You also are encouraged to continue to use our website as a resource for interactive classroom activities in a variety of health areas. Changes are currently underway. Please be sure to visit bluekids.org often to watch for updates.

CHEC continues to be committed to improving the health and well-being of children throughout the state of Wisconsin. We thank you for your support of our programs and all that you do to keep your students safe and healthy.

Sincerely,

Bridget Clementi
Executive Director
